

Nadia Haddad

Reliability engineer, Beirut

Experience

Senior Reliability Engineer, Northwind Systems

March 2021 - Present

- Ran the on-call rotation for eleven services across three regions
- Cut alert noise by two thirds by rewriting the paging thresholds
- Introduced the incident review template the platform group still uses
- Mentored four engineers through their first production postmortem

Reliability Engineer, Cedar Analytics

June 2018 - February 2021

- Built the synthetic checks that caught the storage migration stall
- Owned the capacity forecast for the ingestion tier every quarter
- Automated the disaster recovery drill from start to finish

Education

Lebanese American University, Beirut

2014 - 2018
